

Homework for Weekend - April 12th

1. Pick an idea for your first independent project

Think about your 3-week (quarterly) project. Come up with 2 ideas for simple apps that you can build. You will only be working on one, but it's always good to have choices, and the more ideas you generate, the more ideas you will tend to come up with. Refer to the project description that is being sent today. Be prepared to present an idea or two on Monday.

2. Continue on Store Application.

Continue the homework from April 11 (Store Application). Additionally:

- a. Take note that you need to add this route for your reviews form to work:

```
get '/reviews', :to => 'reviews#index', :as => 'reviews'
```

- b. Add a home page to your app (you may use the product listing)
- c. Deploy your app to heroku

Be prepared to show your project to the class on Monday.

3. Review Associations

Review has_one, has_many, and belongs_to by using resources on the internet.

4. Reflection Time

Spend 30 minutes reflecting on what you learned this week. We covered a lot! You now have the basics of what it takes to be a Rails developer. Please consider writing down your thoughts in a blog entry on Tumblr or Medium.
